**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/534,406	<b>Applicant(s)</b> YAMAMOTO ET AL.	
	<b>Examiner</b> Robert A. Siconolfi	<b>Art Unit</b> 3683	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Information Disclosure Statement filed on 7/12/05 has been received.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 discloses elastic partition member used in the device of claim 1 or 2. Since Claim 1 already contains the elastic partition member, it is unclear as to what is the scope of this claim.

Claim 11 discloses sandwiching members used in the device of claim 1 or 2. Since Claim 1 already contains the sandwiching members, it is unclear as to what is the scope of this claim.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-4, and 6-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Itoh et al (U. S. Patent no. 6,910,683).

See figures first attachment fitting 20, a cylindrical second attachment fitting 19, a vibration-isolating base 14, a Diaphragm 22, a partition 30 comports the liquid-filled chamber 26 into a first liquid chamber 26a and a second liquid chamber 26b, and an orifice 28, the partition including an elastic partition membrane 32 and a pair of sandwiching members 36,38 pinching and holding a peripherally marginal portion of the elastic partition membrane, the sandwiching members include a plurality of openings 45,46 and displacement-regulating ribs 42 (annular 42a and radial/linking 42b), the elastic partition membrane includes displacement-regulating protrusions 48a and 48b (see figure 4b and column 8 lines 49-67)

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Itoh et al. Itoh is relied upon as above. Itoh et al does not disclose 4 or less linking ribs. The number of ribs is a results effective variable that one of ordinary skill in the art would vary in order to adjust the frequency response of the fluid damping device. It is therefore, merely a design choice in order to achieve a specific use of the damper in a specific environment.
